

CollectIQ — Payment Collection & Receivables Command Center

Complete Operational Guidelines, Daily Follow-up Workflows, FIFO Payment Settlements, Master Accountability & Dispute Escalations

SYSTEM VERSION	DATABASE	TARGET AUDIENCE	EFFECTIVE DATE
CollectIQ 4.0 Pro	Firebase Cloud DB (Live)	Collection Executives & Accounts	Immediate Deployment

1 System Architecture & Cloud Access

CollectIQ is a cloud-synchronized Accounts Receivable & Collection Management system built for high-volume trading accounts. It replaces manual spreadsheets with real-time multi-user synchronization, contractual policy date aging, FIFO bill knock-off, and CRM dispute tracking.

1. Scheduled Follow-ups

2. Daily Rokad (FIFO)

3. CRM Escalations

• Policy Due Dates

• Auto Bill Knock-off

• Quality Claims

• PTP Auto-Locking

• Part Payment Aging

• WA Dispute Tickets

• Accountability

• Audit Ledger

• Debit Note Settlement

Access Credentials & URLs

- **Global Web URL:** Hosted on GitHub Pages via secure HTTPS (works on all smartphones, tablets, and laptops).
- **Central Cloud Database:** Google Firebase Firestore project (collectiq-ba467).
- **Multi-User Synchronization:** Whenever any Follower logs a call or payment, all connected devices update in real-time without page refresh.
- **Offline Guarantee:** If internet connectivity drops, the application continues to operate on local browser storage and syncs back upon reconnection.

2 Master Accountability Matrix

Every customer account (**Marka**) is linked to a trading group (**Master**). The system enforces designated primary accountability for collection follow-ups.

MASTER ACCOUNT	DESIGNATED FOLLOWER	ROLE & RESPONSIBILITY	ESCALATION HIERARCHY
MANISH MASTER	GIRDHARILAL	Primary Collection Specialist	Sales HOD / Saurav Bhai
RAJESH MASTER	GIRDHARILAL	Primary Collection Specialist	Sales HOD / Saurav Bhai
RIPTESH / RIPETSH MASTER	GIRDHARILAL	Primary Collection Specialist	Sales HOD / Saurav Bhai
KUNAL MASTER	MAHAVIR	Senior Recovery Officer	Accounts / Management
GUDDU MASTER	MAHAVIR	Senior Recovery Officer	Accounts / Management
KALPESH MASTER	SAJJAN	Collection & Legal Liaison	Accounts / Management
BABLU MASTER / BABLU SHERA	SURENDRA	Field Collection Executive	CRM / Sales HOD
11 MASTER	GIRDHARILAL	Key Accounts Lead	Saurav Bhai

How to Reassign Accountable Followers:

Go to **Marka & Follower** in the sidebar > switch to **Master Accountability Master** tab > click **Change Follower** on the target Master. Check the option "*Update all existing Markas under this Master*" to bulk-transfer existing accounts.

3 Daily Follow-Up Execution Workflow (SOP)

1

Step 1: Check Morning Attention Banner & Schedule

Open the dashboard. Review the top **Control Alert Banner**. Navigate to **Follow-up Schedule** and select your name from the **Follower** dropdown. Click the **Due today** or **Overdue** tab.

2

Step 2: Review Customer Balances & Bill Breakdown

Click **Bills** to view individual invoice dates, policy due dates, and aging breakdown. Click **History** to review previous conversation notes before calling.

3

Step 3: Call Customer & Log Actual Interaction

Click **Update**. Verify **Actual follow-up date** (defaults to today). Enter **Contact Person**, choose **Contact Mode** (Phone call / WhatsApp / Email / In person), and select the appropriate **Action Status**.

Action Status Reference Guide:

Action Status	When to Use	System Behavior & Rules
Promise to Pay (PTP)	Party commits to pay on an exact future date.	Mandatory Fields: Expected Amount (₹) & Promise Date. <i>Next Follow-up date is automatically locked to the PTP date.</i>
Payment Delayed	Party requests a few days grace period.	Enter conversation remark and set a new follow-up date (default +2 days).
Not Responding	Phone unanswered, switched off, or party unavailable.	Schedules next follow-up call within 24–48 hours.
Dispute	Commercial dispute regarding rates, discount or terms.	Requires descriptive remark; flagged for management review.
Claim Matter	Quality dispute, damaged goods, or material return.	Mandatory: Claim / Complaint Number. Creates ticket in CRM Escalations .
WhatsApp Complaint	Issue raised by customer via WhatsApp support.	Mandatory: WhatsApp Complaint Number / Reason. Creates ticket in CRM Escalations .

ACTION STATUS	WHEN TO USE	SYSTEM BEHAVIOR & RULES
Escalated	Account uncooperative or requires senior intervention.	Mandatory: Select target (Saurav Bhai, Sales HOD, Accounts, CRM, or Masters). Account ownership transfers immediately to the target manager.

4 Daily Rokad & FIFO Payment Settlement (SOP)

All received payments must be entered through **Daily Rokad**. The system strictly applies the **FIFO (First-In, First-Out) Principle** to settle the oldest outstanding invoices first.

1 Step 1: Open Daily Rokad Entry

Navigate to **Daily Rokad** in the sidebar > click + **Record payment**.

2 Step 2: Enter Transaction Details

Fill in: **Received Date**, **Payment Mode** (Bank transfer / Cheque / UPI / Cash), **Receipt / UTR Number**, and **Total Received Amount (₹)**.

3 Step 3: Select Marka & Review FIFO Allocation

Select the paying Marka from the dropdown. The system automatically calculates invoice settlement:

- **SETTLED ✓** : Oldest bill fully paid and balance becomes ₹0.
- **PART ⓘ** : Bill partially cleared with remaining balance carried forward.

4 Step 4: Post Payment to Cloud Database

Click **Post to Rokad**. The system updates bill balances, records the transaction in Daily Rokad, adds a payment timeline entry to the Marka's ledger, and reschedules follow-up for remaining balances.

5 GP Lock Policy & Credit Control

GP Lock Trigger Rule:

Any Marka whose scheduled follow-up remains overdue by **19 days or more** is automatically placed in **GP Lock (Hold)**.

Operational Restrictions under GP Lock:

1. **Immediate Billing & Gate Pass Freeze:** No new dispatches, billings, or goods release are permitted under any circumstances.
2. **Schedule Isolation:** Account is removed from the active daily schedule and moved to the dedicated **GP Lock List (#gplock)**.
3. **Management Authorization:** Release from GP Lock requires direct approval from **Saurav Bhai** or **Accounts HOD** upon payment receipt or formal written guarantee.

6 CRM Claims & Dispute Resolution (SOP)

When a Follower logs a **Claim Matter** or **WhatsApp Complaint**, a ticket is created in the **CRM Escalations** module.

1

Step 1: Open CRM Escalations Log

Navigate to **CRM Escalations** in sidebar > find the open claim > click **Resolve & Settle**.

2

Step 2: Select Resolution Mode

Choose: **Discount / Debit Note, Goods Return / Credit Note, Mutual Settlement, or Rejected**.

3

Step 3: Select Affected Invoices & Settle

Check the box for the specific bill(s) against which the claim amount is deducted. Enter the discount amount > click **Confirm & Resolve Ticket**. The bill balance is deducted immediately, and an audit trail is logged.

7 Outstanding Data Synchronization & Exports

Periodic Outstanding CSV Sync

1. Export outstanding report from Tally / BUSY / ERP as a CSV file.
2. Navigate to **Sync outstanding** in the sidebar > click **Choose CSV file**.
3. The system matches existing Markas by name, updates new bill balances, and **preserves 100% of historical conversation logs and PTP promises**.

Reports & Customer Statement Exports

- **Master 22-Column Excel Export:** Click **Export to Excel** in top header for complete receivables registry.
- **Party Bill Statement of Accounts:** Open Marka > **Bills** > **Print Statement** (for PDF) or **Excel (Bills)**.
- **Party Payment Ledger:** Open Marka > **₹ Payments** > **Print** or **Export Excel (Ledger)**.
